ELECTRIC THERMAL STORAGE WATER HEATERS

SMARTER HOME SOLUTIONS

USES DISCOUNTED ENERGY

The price of energy can fluctuate depending on how much of it is being consumed by the community. Electric Thermal Storage water heaters can save you energy and money by drawing energy during times of low demand, while it's less expensive. And we all know that when it comes to saving money, every drop counts.

SKIP THE RUSH

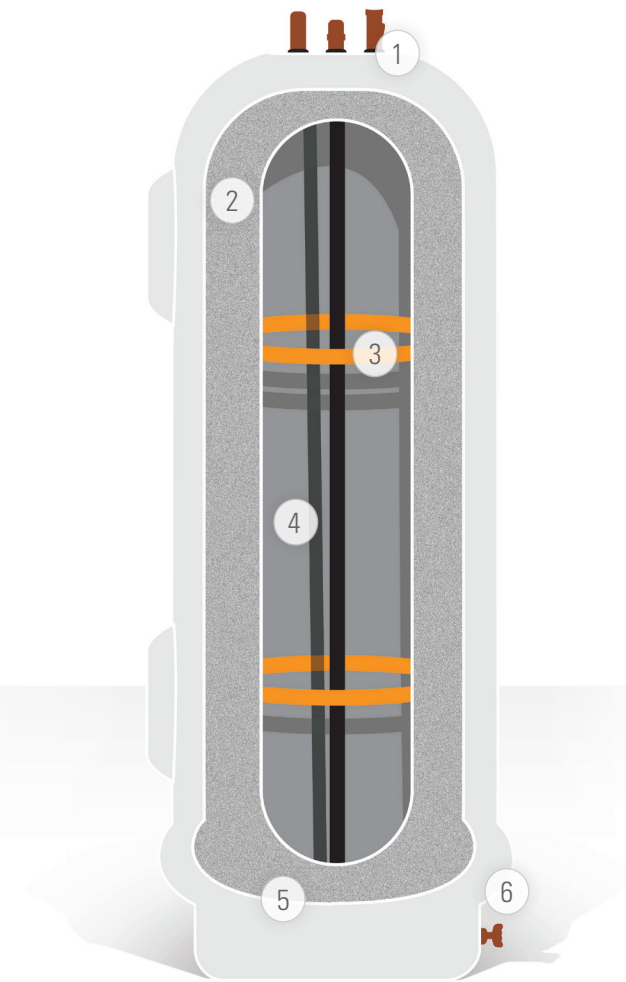

Peak energy refers to periods of time when electricity demand is at its highest. These energy "rush hours" include weekday mornings as people are preparing for work and in the evening around dinner time. Electric Thermal Storage water heaters avoid the congestion by drawing the energy it needs to heat water overnight.

HOT WATER, NO WORRIES

Since the water heated during off peak energy hours is kept hot within its insulated storage tank until you use it, you and your family can save energy and enjoy all the hot water you need, whenever you need it.

ON WATER HEATING

THE WORLD'S MOST ADVANCED WATER HEATER

- 1 Avoid burns thanks to an **anti-scald mixing valve** that blends hot water with cold water.
- 2 The 2.5 inches of **Envirofoam® insulation** minimizes standby head loss, keeping water hot and ready to use.
- 3 High-tech **heating elements** are in direct contact with water, minimizing heat loss and achieving nearly 100% efficiency.
- 4 **Storage tanks** are available with a capacity of up to 105 gallons, allowing for even large families to enjoy hot water all day.
- 5 Its **bowl-shaped bottom** easily allows complete drainage, which also helps prevent sediments from building up.
- 6 While still easy to access, the streamlined design of the **recessed drain valve** prevents it from getting damaged and allows for easier transport.

► BUILT BY FRIENDS AND NEIGHBORS

Gain even more comfort knowing that these water heaters are made right here in the great state of Minnesota, by fellow Minnesotans.

► GUARANTEED TO LAST

Electric Thermal Storage water heaters are easy on energy, but that doesn't mean they're not tough. Made with water-tight polyethylene materials, they resist damage and rust in any environment. In fact, they're the most durable water heaters there are. And a lifetime warranty guarantees that this is the last water heater you'll ever have to buy.

► EARTH FRIENDLY

Every tank is 100% free of harmful CFC and HCFC gasses. Marathon is proud to lead the way in environmentally friendly manufacturing, design and operation.

► EASY INSTALLATION

Lightweight yet heavy duty, these innovative water heaters are among the lightest available and can be installed without the need for special equipment. For professional installation services, contact your cooperative.
